

As we wrap up this month's highlights of some of the many sponsors who help make recreation in Sienna a highlight of living here, we meet Lee Kuhn, Junior Systems Engineer with Unetek, Inc., the Association's Information Technology contractor.

Lee has been a partner of the Association's for 14 years. Lee told us, "Working with Sienna as long as I have it has been fun to watch how Sienna has grown and expanded over the years." We asked him what he enjoys the most working with the Association, and he sincerely shared, "I enjoy working with all of the employees of Sienna, building an infrastructure to support the multiple buildings in the community to support all of the needs for employees & residents as well."

Lee is a native Houstonian and he attended North Harris Community College. Lee and his bride Jessica have two kids: Logan (9) and Peyton (🤓).

Lee's favorite pastimes are camping, photography, range shooting & car & truck shows. "Who is your hero," we asked. "Probably my Dad because I get my work ethic from him."

And what an extraordinary work ethic it is, Lee. You and everyone at Unetek keep us connected so that are efficiently and effectively able to communicate to our residents all of the exciting programming and facilities available to them right here in their community! We can't imagine where we'd be without you guys!
